COUNTRY OF ORIGIN KEY

CBT = Low-Temperature Cooking
FAO = Fishing area according to FAO classification
FAO areas indicate the area of origin of the catch.
Prices for meat sold per 100 g refer to the weight of the product.

INFORMAZIONI ALLA CLIENTELA

Some products may have undergone blast chilling and/or freezing at source in accordance with current regulations. Fish intended to be consumed raw or practically raw has undergone preventive treatment in compliance with Regulation (EC) No. 853/2004.
For any information regarding the presence of substances or products that may cause allergies or intolerances, please ask a member of staff. Despite the utmost care taken in preparing the dishes, cross-contamination between allergens cannot be completely ruled out.
Ingredients may vary according to seasonality and market availability.

ALLERGENS

1. CEREALS AND DERIVATIVES
All cereals containing gluten are considered allergens, such as wheat, rye, barley, oats, spelt and kamut. The list also includes their hybridised strains and derived products.

2. CRUSTACEANS
Proteins from prawns, shrimps, langoustines, crabs, lobsters and crawfish are considered allergens.
Products containing ingredients derived from crustaceans must also be avoided.

3. EGGS
Eggs are considered allergens both cooked and raw, and also when present in derived products such as egg pasta, biscuits, cakes, omelettes, mayonnaise, creams, breaded foods, flans, etc.

4. FISH
Fish allergy may occur with all types of fish and fish-derived products, with the exception of fish gelatine used as a carrier for vitamin preparations or as a clarifying agent in beer and wine.

5. PEANUTS
The main sources of allergens are derived products such as peanut oil, peanut butter, peanut flour and peanut milk, used as ingredients in creams, snacks, nougat, etc.

6. SOY
The proteins responsible for allergies are present in all soy-based products, with the exception of: refined soybean oil and fat, natural mixed tocopherols, natural D-alpha tocopherol, natural D-alpha tocopherol acetate, natural D-alpha tocopherol succinate derived from soy, vegetable oils derived from phytosterols and phytosterol esters derived from soy, and vegetable stanol ester produced from vegetable oil sterols derived from soy.

7. MILK
Milk and products made from milk or lactose are considered allergens, with the exception of whey used for the production of alcoholic distillates and lactitol.

8. NUTS
This includes almonds, hazelnuts, walnuts, cashews, pecan nuts, Brazil nuts, pistachios, macadamia nuts and all products derived from them, with the exception of those used for the production of alcoholic distillates.

9. CELERY
Celery is considered an allergen whether present in pieces or in derived products such as soup preparations, sauces and vegetable concentrates.

10. MUSTARD
Mustard is an allergen that can be found among the main ingredients of sauces and condiments, especially in mustard-based products.

11. SESAME
Whole sesame seeds are often used in bread preparation, but traces of sesame are also often found in certain types of flour.

12. SULPHUR DIOXIDE AND SULPHITES
Only when present in concentrations higher than 10 mg/kg or 10 mg/l, expressed as SO_2 and used as preservatives, they can be found in preserved fish products, pickled foods, foods preserved in oil or brine, jams, vinegar, dried mushrooms, soft drinks and fruit juices.

13. LUPINS
Lupins are now present in many vegan foods, in the form of roasts, vegan sausages, flours and similar products based on this protein-rich legume.

14. MOLLUSCS
Molluscs are present in dishes containing scallops, razor clams, queen scallops, date mussels, fasolari clams, sea snails, small sea snails, mussels, murex, oysters, limpets, sea truffles, tellins and clams, or in products derived from them.
